

Save time & make more money!

Other levelling systems on the market require you to use four pieces per corner in order to keep tiles level and also use spacers to give tiles consistent joints, Levolution requires only one per corner. This results in increased productivity, saving you time to lay more tiles and make more money!

A complete Spacer & Tile Levelling System in one!

- Cost effective
- Enables fast & level installations
- Conforms to AS 3958.1-20007
- Saves time
- Saves money
- Get better results

LevolutionTM
A revolution in tile spacing and levelling!

levolution™

A revolution in tile spacing and levelling!

The easiest and most time efficient way to level and space wall and floor tiles

The Levolution system has been cleverly designed to be an all in one tiling tool that will level and space your tiles in one process. Making this system effortless, cost effective and time saving.

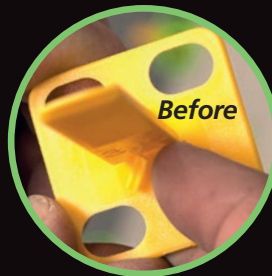

Spacers are inserted between the tiles to create a desired space of 1.5mm, 2mm or 3mm. Spacers come in a Cross, Tee or Flat design in each size to accommodate your tiling needs. Once the tile is set, Caps are removed using the De-Capper and Spacers are removed with a small amount of pressure to break the Spacer away from the stem, leaving a flush finish ready to grout.

Introducing the new Universal Spacer from Revolution.

The recently released Universal Spacer has snap off lugs that convert the Cross Spacers.

The Universal design is initially a Cross Spacer, snap 1 lug off to create a Tee Spacer and both lugs to create a Flat Spacer.

As shown in diagrams above, the lug snaps off easily and below the surface to maintain accurate Spacer width when converting to a TEE or FLAT.

Evolver Tensioning Tool

Evolver tool is used to clamp and level tiles. Can be adjusted to prevent over tensioning.

De-Capper

The De-Capper allows you to release tension or completely remove the Cap

www.levolution.com.au

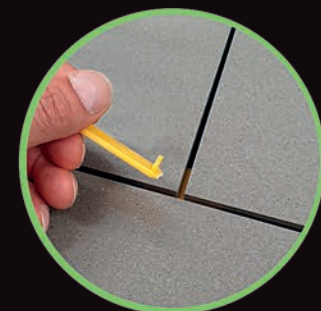

CROSS for stack bond

TEE for staggered bond

DE-CAPPER for easy Cap removal

SPACER is easily removed and snaps off cleanly at base
