

SURFACE PROTECTION

PROTECTION BOARD

Protect your project from the ground up with DTA Dustshield — the heavy-duty, high-impact solution for temporary surface protection on construction and renovation sites.

Engineered from durable polypropylene, Dustshield delivers reliable defence against foot traffic, heavy equipment, spills, and debris, helping preserve floors, walls, and high-use areas in pristine condition. With water-resistant and fire-resistant properties, plus a soft felt backing to safeguard delicate surfaces, it's protection you can trust across every stage of the job.

Available in 3mm and 5.5mm thicknesses, Dustshield adapts to your needs. From residential builds to large-scale commercial sites, DTA Dustshield keeps surfaces protected, projects on track, and finishes flawless.

Strong. Versatile. Built to withstand the job.
