

PRECISION AND INNOVATION

FROM THE CONSTRUCTION SITE DIRECTLY TO PRODUCTION

Solaflex's patented digital measuring system streamlines workflows and minimises errors, enhancing efficiency at every stage. Say goodbye to illegible hand-drawn sketches.

Simple, supported and intuitive measuring

Error-free transfer of measurements

Effortless creation of complex contours

Maximise time and cost efficiency

Create production data directly on-site, minimising the effort required for job preparation

Export drawings in DXF or PDF formats and tables in CSV

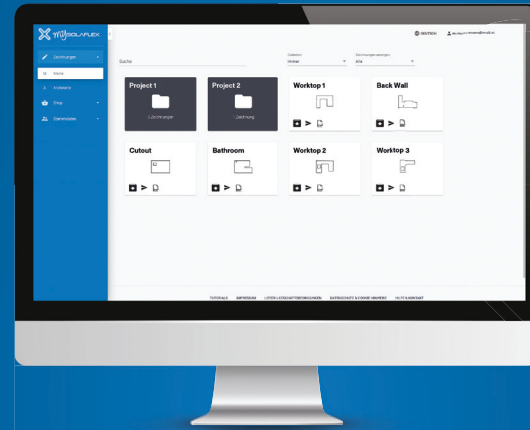

Available at all times

TRADE 4.0

PERFECT MEASUREMENTS IN A FEW SIMPLE STEPS

solaflex.com

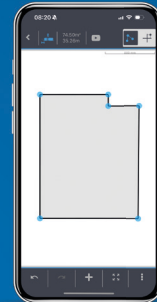

IF YOU WANT
TO BE READY
FOR DIGITALIZATION,
**THEN YOU'VE GOT
TO START NOW!**

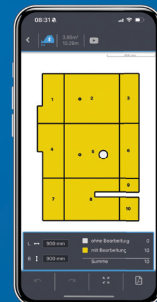

1. Freeform measurements

for right-angled contours, perfect for floor plans.

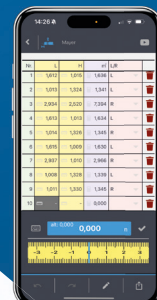

2. Coordinate-based measurements

ideal for capturing slopes, angles, and meeting high-precision demands (e.g., kitchen counter-tops, glass cutting, large-format tiles, etc.).

3. Table-based measurements

enables the recording of measurements in a fully customisable table (e.g. windows, doors, etc.).

Quick and simple digital measurements! Instantly digitise and visualise your results by transferring data directly from your digital tape measure or laser distance meter into the Solaflex app.

Upon completion, easily export your drawings and tables as PDF, DXF, or CSV files, enabling you to continue working immediately.

PREVENT
MISTAKES &
SAVE TIME

DOWNLOAD APP NOW!

Create DXF and PDF files
with the ability to add photos and notes.

Project & Drawing Management
drawings are automatically saved and neatly organised into project folders.

Templates
add and customise for an even more efficient workflow.

Freeform & Coordinate Mode
measurement methods for creating precise drawings.

Lock in actual measurements
lock the created contour and easily add or subtract tolerances and dimensions.

Grout grid
effortlessly create, customise, and apply to your drawing.

Bill of Materials (BOM) Breakdown
detailed display and dimensioning of individual elements.

Table View Mode
customise tables, save as templates, directly input measurements and text and export as CSV files.

Intuitive, guided operation
enhanced with video tutorials
